

Features

- 7 dBm Low noise output
- 0.0V to 5.0V Tuning Voltage
- 10 MHz per volt
- 5V supply; 27 mA typ.
- -119 dBc/Hz at 10 KHz typ.
- -139 dBc/Hz at 100 KHz typ.
- 3.0 MHz per volt Pushing
- 8.0 MHz Pulling

Picture

Applications

- Test Instrumentation
- Synthesizer VCO
- SATCOM
- Point to Point

Description

The VCO3360 offers a very low noise 7 dBm sine wave output from 665 to 685 MHz in the industry standard 12.7 x 12.7 mm footprint. Automated high speed phase noise testers allow for 100% of production units to be screened for noise.
